- View up-to-the-minute information

Claim Management

Boost your bottom line,
business productivity and efficiency

Boost your bottom line, business productivity and efficiency with Trideo's powerful claims management solution. Trideo helps organizations streamline and automate the management of claims, litigation expenses, reports and records while facilitating improved collaboration and communications between claim managers, defense counsel and insurance personnel for improved outcomes.

With real-time web-based access to all business critical information, risk managers have the tools they need to immediately notify their claims group or third-party administrator of new or potential claims while ensuring appropriate reserves, assignment of counsel and proactive claims resolution. Simultaneously, defense attorneys gain the freedom to submit invoices electronically for rapid processing. Automate auditing of legal expenses seamlessly against case budgets and legal guidelines to ensure appropriate reserves while tracking real-time policy limit erosion and claimant demographics to better control and minimize cost.

Trideo enables rapid upload, organization and archive of invoices, investigation notes, pleadings, medical records, witness testimony and analyses using various file formats. Real-time aggregation erosion and coordinated MMSEA Section 111 triggers simplify reporting, with summary reports generated in convenient presentation-ready PDF formatting.

Discover why so many risk managers consider Trideo claims software one of the easiest end-to-end claims management solutions available.
